HELLO, EDUARDO TORREZ!

I am a full stack, desktop and mobile developer from Chiapas, Mexico, and I work developing applications for almost all types of smart devices. I am currently developing web microservices. I like to solve "complex" problems through algorithms to generate simple and intuitive solutions. My goal is to generate solutions through clean code and good practices. Also, I always add a personal touch to all projects, this allowing for scalability and support. My main skills are teamwork, ease of adaptation, tolerance to pressure and Empathy. I will glad to work for you.

HIRE ME
